180618

Da 3 mænd mødtes i starten af 1949, i en sejlbådsforretning i Seattle, havde ingen af dem kunnet forudse de vidt rækkende konsekvenser af deres eventyr, som var at bygge en bedre racer båd.

Slo-Mo-Shun IV blev virkelig den bedste racer båd der nogensinde var blevet bygget. Men hun var mere end det: Slo-Mo-Shun IV ramte tusinder af entusiaster lige i hjertet og forandrede for altid generationers specielle følelse, som de har i den første uge i august i Seattle.

Slo-Mo-Shun IV forandrede livet for dem som stod hende nærmest og som havde været med fra starten. Det tog næsten livet af nogen af dem. Hun fremmanede gys og vrede, & også tårer og inspirerede til poesi.

Bygger: Jensen Motor Boat Company

Søsat: Oktober 1949

Materialer: Skal af marine kryds finér (Tanguile Mahogni, $\frac{1}{2}$ " bund og sider, $\frac{3}{16}$ " dæk), struktur af eg og gran, undervandsskibet er beklædt med 100/1000 aluminium, dele fra fly-industrien, støbt/smedet stål.

Skroglængde: 28'-0"

Største højde på skrog: 2'-6"

Bredde: 11'-6"

Vægt: 4,400 lbs

For mere information, venligst gå på den officielle website:

<http://www.slomoshun.com>

When three men met in early 1949 at a Seattle sailboat shop, none of them could have foreseen the peculiar and far-reaching consequences of their joint venture to build a better race boat.

Slo-Mo-Shun IV was indeed better than any previous race boat. But she was more than that:

Slo-Mo-Shun IV touched the hearts of thousands who cheered her on and changed forever the way generations of Seattleites feel about the first week in August.

Slo-Mo-Shun IV transformed the lives of those most closely associated with her, nearly destroying some of them. She evoked thrills and anger and, ultimately, she prompted tears and inspired poetry.

Builder: Jensen Motor Boat Company

Launched: Mid-October 1949

Materials: Shell of marine plywood (Tanguile mahogany, $\frac{1}{2}$ " bottom and sides, $\frac{3}{16}$ " deck), structure of oak and spruce, aluminium cladding 100/1000 on running surfaces, aircraft-type fittings, forged-steel hardware.

Length between Perpendiculars: 28'-0"

Depth of Hull Center Section: 2'-6"

Beam: 11'-6"

Weight (dry): 4,400 lbs

D

Als sich drei Männer Anfang 1949 in einem Seattler Segelbootladen trafen, hätte von ihnen die seltsamen und weit reichenden Folgen ihrer gemeinsamen Idee voraussehen können, ein besseres Rennboot zu bauen.

Das Ergebnis war die Slo-Mo-Shun IV. Die Slo-Mo-Shun IV war wirklich besser als jedes vorherige Rennboot. Die Slo-Mo-Shun IV gewann Rennen um Rennen (1950 mit Ted Jones den Gold Cup in Detroit, die Prestige trächtige Harmsworth Trophy und und und). Aber sie war mehr als das: Die Slo-Mo-Shun IV berührte die Herzen von tausenden Fans, und sie änderte in den ersten Wochen im August die Gefühle ganzer Generationen von Bürgern Seattles.

Slo-Mo-Shun IV veränderte insbesondere das Leben derjenigen radikal, die eng mit ihr verbunden waren und brachte einige beinahe um ihr Leben. Sie rief Nervenkitzel und Ärger hervor, bis hin zu Tränen und poetischer Dichtung.

Bootserbauer:	Jensen Motorbootgesellschaft Seattle
Fertiggestellt:	Mitte Oktober 1949
Materialen:	Deck aus Marine-Sperrholz, (Tanguile Mahogni, 1,27cm dick im Bereich von Boden- und Seitenteilen, 0,5cm dick im Decksbereich), Struktur aus Eiche und Fichte, dem Wasser zugewandte Rumpfbereiche waren mit Aluminium beplankt, Einbauteile entstammten teilweise aus dem Flugzeugbau, die Fittings waren geschmiedet.
Länge über alles:	28'-0"
Höhe des Bootes:	2'-6"
Breite:	11'-6"
Gewicht (leer):	2000kg

F

Lorsque les 3 hommes se rencontrèrent chez un marchand de bateaux à Seattle aucun d'entre-eux n'imaginait les conséquences de leur rencontre sur la construction des bateaux de vitesse.

Le SLO-MO-SHUN IV fut vraiment meilleur que tous les bateaux de vitesse précédents. Mais il était aussi plus que cela : SLO-MO-SHUN IV toucha le cœur de milliers de personnes qui le supportaient, et il modifia pour longtemps la façon de vivre la première semaine d'août des habitants de Seattle.

SLO-MO-SHUN IV transforma la vie de personnes allant même jusqu'à en détruire certaines. Il évoque des frissons et de la colère, il tira des larmes et inspira des poèmes.

Constructeur:	Jensen Motor Boat Company
Lancement:	Mi-octobre 1949
Matériaux:	Coque en contre-plaquée marine (Tanguilemahogany, 12 mm pour le fond et les côtés, 5 mm pour le pont) structure en chêne et épicea, revêtement des surfaces fonctionnelles en aluminium, accastillage type aviation, accessoires en acier forgé.

Longueur hors tout :	28'-0"
Profondeur de coque en section central :	2'-6"
Largeur:	11'-6"
Poids à vide:	2000 kg

NL

Toen drie mannen elkaar in 1949 in een watersportwinkel ontmoetten, kon geen van hen vermoeden wat een vreemde en verreikende consequenties hun samenwerking zou hebben voor hun bij het bower van een betere raceboot.

Slo-mo-shun IV was inderdaad beter dan welke voorgaande raceboot ook. Maar ze was meer dan dat: Slo-mo IV raakte het hart van de duizenden mensen die haar toejuichten en veranderde voor altijd de gevoelens van de Seattlers bij het denken aan de eerste week van augustus.

Slo-mo IV veranderde het leven van diegenen die het meest met haar te maken hadden en verwoestte bijna de levens van sommige van hen. Ze wekte sensatie en woede op en , tenslotte zette ze aan tot tranen en inspireerde tot poëzie.

Bouwer: Jensen Motor Boat Company

Tewaterlating: Midden oktober 1949

Materiaal: Romp van scheepstriplex (Tanguile mahonie, $\frac{1}{2}$ " bodem en zijkanten, 3/16" dek), kiel en spanten van eiken en spar, 100/1000 aluminium bekleding van de waterrakende oppervlakken, vliegtuig-fittings en smeestalen roer en schroef.

Lengte: 28 voet

Diepte middendeel romp: 2 voet 6 inches

Breedte: 11 voet 6 inches

Gewicht (droog): 4.400 lbs.

E

Cuando tres hombres se reunieron a principios de 1949 en una tienda de barcos de vela en Seattle, ninguno de ellos podría haber previsto las consecuencias peculiares y de largo alcance de su empresa en colaboración para construir un mejor barco de carreras.

Slo-mo-shun IV era definitivamente mejor que cualquier otro barco de carreras anterior. Pero el barco era más que eso: Slo-mo IV se ganó el aprecio de miles de aficionados que le vitoreaban y cambió para siempre la manera en que generaciones de residentes en Seattle aprecian la primera semana de agosto.

El Slo-mo IV transformó las vidas de aquellos que estaban más estrechamente relacionados con el barco, y casi destruyó algunas de esas vidas. El barco pudo evocar emociones e ira y, finalmente, provocó lágrimas e inspiró poesía.

Constructor: Jensen Motor Boat Company

Botadura: Mediados de octubre de 1949

Materiales: Cubierta de madera contrachapada para uso náutico (Tanguile caoba, $\frac{1}{2}$ pulgada en el fondo y los lados, 3/16 de pulgada en cubierta), estructura de roble y abeto, recubrimiento de aluminio 100/1000 en las superficies de trabajo, aditamentos de tipo aeronáutico, herrajes de acero forjado.

Eslora entre

perpendiculares:

28 pies – 0 pulg.

Altura de puntal en la

sección central del casco:

2 pies – 6 pulg.

Manga:

11 pies – 6 pulg.

Peso (seco):

4.400 lbs. (2.000 kg)

I

Quando tre uomini si incontrarono in un negozio di barche a vela di Seattle all'inizio del 1949, nessuno di loro avrebbe potuto prevedere le peculiari conseguenze a lungo termine della loro società per costruire una migliore imbarcazione a vela da competizione.

In effetti, Slo-mo-shun IV era superiore a qualsiasi altra imbarcazione a vela precedente. Ma c'è di più: Slo-mo IV conquistò i cuori di migliaia di persone che la acclamarono, e cambiò definitivamente il modo in cui viene percepita la prima settimana di agosto da parte di generazioni di abitanti di Seattle.

Slo-mo IV ha trasformato le vite di quanti hanno avuto più direttamente a che fare con lei, quasi distruggendone alcune. Ha evocato brividi e rabbia, finendo per provocare lacrime ed ispirare poesia.

Costruttore: Jensen Motor Boat Company

Data del varo: Metà ottobre 1949

Materiali: Coperta in legno compensato per usi nautici (mogano Tanguile, ½ pollice sul fondo e sui lati, 3/16 di pollice sul ponte), struttura in quercia e abete, rivestimento in alluminio 100/1000 sulle superfici scorrevoli, accessori di tipo aeronautico ed attrezature metalliche in acciaio fucinato.

Lunghezza tra le perpendicolari: 28 piedi

Profondità della sezione centrale dello scafo: 2 piedi e 6 pollici
Baglio: 11 piedi e 6 pollici

Peso (secco): 4400 libbre (2000 kg)

P

Quando os três homens se encontraram, no início de 1949, na loja de barcos de Seattle, nenhum deles poderia prever as consequências peculiares e longo alcance da sua cooperação para construir um barco de corrida melhor.

O Slo-mo-shun IV era, de facto, melhor do que qualquer outro barco de corrida anterior. Mais era mais do que isso: Slo-mo-shun IV tocou os corações de milhares de pessoas que o aplaudiram e mudou, para sempre, a forma como gerações de habitantes de Seattle se sentiam acerca da primeira semana de Agosto.

O Slo-mo-shun IV transformou a vida dos que estavam mais próximos dele, quase destruindo alguns deles. Ele evocou emoção e raiva e, por fim, despertou lágrimas e inspirou poesia.

Construtor: Jensen Motor Boat Company

Lançado em: Meados de Outubro de 1949

Materiais: Escudo de madeira compensada marinha (mogno de Tanguile, 1/2 " fundo e lados, placa 16"), estrutura de carvalho e abetos vermelhos, revestimento de alumínio 100/1000 nas superfícies de corrida, encaixes de avião-tipo, ferragem de aço forjado.

Largura entre perpendiculares: 28'-0"

Profundidade do casco na secção central: 2'-6"

Lateral: 1 l'-6"

Peso (seco): 4,400 lbs
