

MAMBA MONSTER 2

Meet the next Monster!

It's time to meet Monster 2, he's just as mean as his older brother but he likes to get wet. That's right; the Mamba Monster 2 ESC is now potted by the good people at Castle in Kansas City. Users can run their vehicles through the morning dew, down the muddy road, across the soggy snow or just about anywhere else you'd be interested in running a 1/8th scale RC buggy or truck.

Mamba Monster 2 is intended for on-road, buggies, truggies and monster trucks running up to 6S LiPo and tipping the scales at up to 15lbs. The innovative new case allows for fan changes, if necessary. Solder posts now permit users to change battery wire length and direction as needed.

As always, the Mamba Monster 2 offers industry leading software functions and USB programming capability via Castle Link USB adapter. Remember, the fan is not water proof, so users need to remove the fan before they head out into wet conditions.

Legal mumbo jumbo that we need you to read

Although Monster 2 and Castle brushless motors are waterproof, they can corrode when exposed to corrosive materials, such as salt water. Always rinse the ESC and motor with clean water after exposure to corrosives or dirt. While the motor and controller may be waterproof, we suggest users confirm that the rest of their vehicle, including the batteries, servos, radio and chassis are also waterproof before exposing them to liquids of any kind.

Technical specs

Max. Voltage (V)	25V
N° Li-xx cells	2 ~ 6
N° Ni-xx cells	5 ~ 18
Cont. Current (A)	+120A
Dimensions	47x56x34mm
Weight (no cable)	111g
SBEC power	5V - 7V / 5.0A

**Ideal for
6S use**

CC-010-0108-01 MAMBA MONSTER 2 COMBO 1515 2200KV

MAMBA MONSTER 2 COMBO

Set content:

- Mamba Monster 2 ESC
- Neu-Castle 1515 Series 4-Pole 2200KV brushless motor

Intended for up to 6S (25.2 Volt) operation. Incredible in monster trucks with up to 6S LiPo packs (4S LiPo is the sweet spot), and works great in 1/8th buggies and truggies as well. The Neu-Castle 1515-2200Kv motor is 75mm long making it capable of handling more power and heavier vehicles than the Neu-Castle 1512-2650 motor.

Insane performance guaranteed!
